

## Technical Bulletin #2009-05

To: All Grand-Am Competitors  
 Effective: Immediately, unless otherwise noted.  
 From: Grand-Am  
 Date: April 9, 2009

(Changes in Red)

### SPORTING REGULATIONS

#### 8-4 Race Start –

8-4.1 Rolex Sports Car Series/ Koni Sports Car Challenge - Cars will be gridded by the following procedure. The pit lane will be open to competitors approximately 30 minutes prior to the scheduled race start time for pre-race, and fan pit walk activities. Grand-Am may penalize teams for non-participation in pre-race activities. Cars may drive or be pushed to their pit spot at this time. Tires may be changed and preparation work may be done up to the opening of pit exit for the exploratory laps. No fuel may be added at any time. Cars must be brought to pit lane fully fueled. No fueling is permitted until after the completion of one green flag race lap. At a pre-determined time (announced at the driver's meeting) prior to the scheduled race start the pit exit will be open for exploratory laps. For 5 minutes, unless otherwise specified in the driver/crew chief briefings, competitors may proceed around the track, to their grid positions, or return to their pit lane spot. The competitor may take additional exploratory laps via the pit exit. The pit exit will only be open 5 minutes. After 5 minutes, or the specified time, pit exit will close and all cars should be in their grid spots. Any cars remaining in pit lane must start the race from pit out, in the order of arrival, after the last car on the track clears pit out at the start of the race. Cars on course at the time of pit exit closure may proceed to their starting grid spot or return to their pit lane spots and start from pit lane. Once all cars have gridded or returned to the pits, all engines must be shut off. Engines must remain off until the command to start your engines.

### GT REGULATIONS

2-4 Corvette C6

2-4.5 Minimum weight Prep 1 is 2550, Prep 2 is 2575 with solid axle, 2600 with IRS, or 2756 with DP transaxle.
